## **GEORGIA TECH'S CIVIC DATA SCIENCE PROGRAM**

Learn more about Georgia Tech's exciting 10-week immersive research experience for undergraduates interested in contributing to the developing field of data science!

**Learn More**

## SMART SEA LEVEL SENSORS

The Sea Level Sensor project is a partnership between Chatham Emergency Management Agency (CEMA) officials, City of Savannah officials, and Georgia Tech scientists and engineers who are working together to install a network of internet-enabled sea level sensors across Chatham County. The real-time data on coastal flooding will be used for emergency planning and response.

We believe all communities can be smart. Through the integration of technology and data, communities of various sizes, geographies, and development can be empowered to improve their quality of life. That is why we have pulled together a cross-sectoral partnership to raise awareness and knowledge, develop networks, and implement smart projects. This monthly newsletter is part of this greater effort!
