Everyday Georgia

Exhibit Opening and Reception

Join us on **Thursday, September 27** at IPaT as we showcase the portraits and stories of Georgians from different walks of life and regions of the state during the opening of this special exhibit.

The *Everyday Georgia* project explores the lives of those touched by Georgia Tech's research and technology initiatives. Through the coupling of photographs and audio interviews, the project shares the personal stories of more than a dozen Georgians – their challenges and accomplishments, and their vital role in Creating the Next at Georgia Tech.

Everyday Georgia is made possible by the Institute for People and Technology at Georgia Tech, with sponsorship by the Georgia Tech Library's IMLS-funded Communication Through Art (Sparks Ignition Grant SP-02-16-0031-16) program in partnership with the Georgia Tech Office of the Arts Creative Curricular Initiatives program.

We believe all communities can be smart. Through the integration of technology and data, communities of various sizes, geographies, and development can be empowered to improve their quality of life. That is why we have pulled together a cross-sectoral partnership to raise awareness and knowledge, develop networks, and implement smart projects. This monthly newsletter is part of this greater effort!
