Pre-Proposal
1 Vision

This section should address the community’s motivations for participating and what they expect to achieve in the long run. Topics to cover may include one or more of the following:

- The community’s current conditions;
- Motivating factors;
- Citizen input;
- Descriptions of prior efforts;
- Long-term and/or end-goals;
- The envisioned future state of the community;
- The goals of this project.

2 Plan

This section should address what the community will do during its first year. This section should explain what the community will do should they be selected for support and funding by Georgia Smart. Topics to cover should include the following:

- The plan of action that the community will execute should they win the competition;
- How the plan will impact the community;
- How this plan advances the community towards addressing its overall vision; and

Finally, the specific topic area being addressed by the proposal must be clearly identified in this section.

3 Research

This section should address the research component of the proposal. Please explain the potential research topics you believe will benefit your project and what research expertise would be required to address these project needs. Topics to cover should include the following:

- A description of the type of research activities to be performed;
- How those activities will support either the current-year plan or the overall framework plan; and
- How the research aligns with a “smart” technology that is pertinent to the community’s overall vision.

4 Collaboration

This section should contain:

- A brief narrative describing how each government and non-governmental entity will participate in the team effort;
